Professional Summary

Results-driven Software Engineer with a proven track record of architecting scalable backend services, optimizing data workflows, and developing modular full-stack solutions using .NET, TypeScript, Angular, and Python. Skilled at transforming technical concepts into client-facing enterprise software, leveraging SOLID principles, and collaborating across cross-functional teams to accelerate deployment cycles and drive business growth.

Professional Experience

Software Engineer & Pod Lead, *Syncfusion Software Services Kenya Limited* 08/2024 – Present
Kisumu, Kenya

- Lead a high-performing pod of 4 software engineers, delegating tasks, conducting code reviews, and accelerating sprint delivery cycles.
- Engineered scalable C# web APIs and core backend libraries, reducing data processing latency by 35% and improving system throughput.
- Designed loosely coupled code modules using software design patterns, reducing technical debt and cutting codebase onboarding time for new developers by 10%.
- Integrated relational SQL databases with backend microservices, optimizing queries to reduce data retrieval times by 17%.
- Built modular frontend components using Angular and TypeScript, reducing code duplication by 20% and accelerating UI rendering.
- Collaborated via Git workflows including rigorous code reviews and pull requests to achieve a 35% production-ready deployment success rate.

Product Demo Engineer, *Syncfusion Software Services Kenya Limited* 05/2023 – 02/2024
Kisumu, Kenya

- Delivered 20+ technical product demonstrations to enterprise prospects, directly driving a substantial increase in Bold Reports client acquisitions.
- Created 8+ cross-platform code samples using React, Angular, Blazor, and .NET Core to showcase product capabilities across diverse ecosystems.
- Gathered global client feedback through active cross-functional collaboration, boosting product demo engagement by 20%.

Education

Bachelor of Science in Environmental Science, *Kenyatta University* 07/2022
Nairobi, Kenya

Core Competencies

Backend Development
C#, .NET Core, Python, Flask, RESTful Web APIs, Architecture (SOLID Principles, OOP)

Database & Architecture
SQL, Relational Databases, Microservices, RESTful Web APIs, OOP, SOLID Principles, Software Design Patterns

Frontend Development
TypeScript, Angular, JavaScript, HTML5, CSS3

Tools & Methodologies
Git, GitHub, Version Control, Code Reviews, Agile/Scrum

Certifications

Software Development Certification
Moringa School June 2024

AI Career Essentials Certification
ALX Africa July 2024

Technical Projects & Interests

Tech for Sustainability
Actively exploring and programming tech-driven solutions for global environmental challenges.

Community Contribution
Participating in open-source tech workshops and community-driven coding projects.
